SEASPACE CORPORATION COMPLETES INSTALLATION OF 2.4M X-BAND ACQUISITION AND PROCESSING SYSTEM FOR PAGASA

Poway, California, January 2, 2008-SeaSpace Corporation has completed the installation of a 2.4m X-band acquisition and processing system for the Philippine Atmospheric, Geophysical and Astronomical Services Administration (PAGASA). PAGASA's official mandate is "to provide protection against natural calamities and utilize scientific knowledge as an effective instrument to insure the safety, well-being and economic security of all the people, and for promotion of national progress."

The installation was performed in December 2007 at Quezon City, Philippines.

"The installation went smoothly and everyone at PAGASA was excited to receive the system," reported Tony Burunoff of SeaSpace, who led the installation.

About SeaSpace Corporation:

SeaSpace Corporation empowers people to improve the safety, security and enjoyment of our global environment. SeaSpace manufactures TeraScan® hardware and software products that provide customers with timely and accurate satellite-derived weather and environmental information. These systems are in operation at more than 450 customer sites in over 30 countries.
